- Physical Inventory
- Cycle Count
- Transfer
- PO Receiving
- MOBILEtrak Purchase Requisition

## Wireless Solution Reduces Time and Increases Accuracy in the Warehouse

MOBILEtrak Wireless Warehouse Management Software from ID Solutions is a direct interface with the Daffron MMS iXp. It is designed to emulate the functionality of the inventory transactions users are familiar with on the Daffron Software system.

Using Wi-Fi Wireless Technology, MOBILEtrak collects and transmits data "Real-Time" through web-services provided through integration with iXp. Inventory Management, Release Job, Material Charge Outs and Returns are now collected at point of work providing a Mobile Solutions where it is needed.

- Charge out Material and/or Return Material Real-Time
- Pick Items for Staking Sheets and process transactions in the warehouse
- Decrease errors in data collection
- Generate Purchase Requisitions
- Interfaces with Daffron system Real Time through Wi-Fi Wireless Technology

Give your warehousemen the power to record and update inventory at the warehouse level without having to write it down or sit at a PC workstation for hours, entering the information into the system?

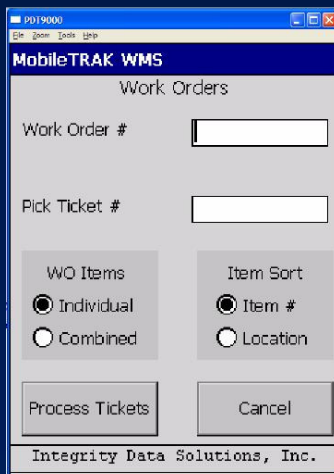

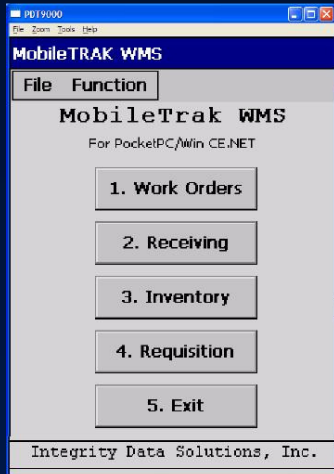

WIRELESS MATERIALS MANAGEMENT AND BARCODING is an exciting add-on to the Daffron system providing capability that provides this big benefit: your warehouse personnel will simply enter warehouse transactions on a wireless handheld terminal at the point of activity. Real-Time data collection at the warehouse level.

Your warehouse staff is able to requisition as they are walking the floor, release all the material to the field for a particular job in minutes. And MOBILEtrak enables your front office to monitor and record charge-backs and salvage items with spot-on accuracy, as they are happening.

The Materials Management system is currently installed at more than 10 utilities across the country.
